Aspiring Software Engineer

EDUCATION

Usha Mittal Institute of Technology
Bachelor of Technology in Artificial Intelligence

Aug. 2023 – May 2027
CGPA : 8.005

PROJECTS

ShareSphere - A Peer-to-Peer Item Rental Platform

- Developed a full-stack peer-to-peer item rental platform that connects item owners (lenders) with borrowers, enabling users to list, discover, and rent items such as electronics, cameras, furniture, tools, and musical instruments.
- Implemented secure user authentication and verification workflows, including email-based OTP verification, bcrypt password hashing, lender/borrower verification forms, document uploads, and admin approval before users can access rental functionality.
- Built the item management and listing module, allowing verified lenders to create listings with item details, category, condition, rental price, security deposit, rental duration, pickup method, rental terms, and supporting image/video uploads using Multer.
- Developed the item discovery and booking workflow with category-based browsing, search and filtering, detailed item pages, rental duration selection, availability checking, and booking request generation while preventing conflicting bookings.
- Implemented a structured rental lifecycle covering booking requests, Razorpay test-mode payment processing, pickup confirmation, item return confirmation, deposit handling, and transaction status tracking.
- Designed a two-sided handover verification mechanism using one-time pickup/return codes and condition photographs, preventing unilateral confirmation of rental milestones and providing evidence for potential disputes.
- Developed an admin dashboard and dispute resolution system for managing user verification, monitoring disputes, reviewing submitted evidence, and processing applicable deductions and refunds.
- Integrated Google Gemini for AI-assisted verification to help administrators identify potential discrepancies in submitted identification information and images, while keeping final verification decisions under human review.
- Built the backend using Node.js, Express.js, and MySQL, implementing APIs and database operations for users, listings, bookings, verification requests, disputes, and transaction records.

LEADERSHIP & ACTIVITIES

Junior Council Member, IEEE Student Chapter

2024 – 2025

Usha Mittal Institute of Technology

- Coordinated technical and cultural events as part of the IEEE Student Chapter, contributing to event planning and team coordination.

Member, Writers' Club

2023 – 2024

Usha Mittal Institute of Technology

- Contributed articles to the college magazine and assisted with editing and content preparation.

SKILLS

Languages: C++, SQL (PostgreSQL, MySQL)

Tools: HTML, CSS, MySQL, Git, GitHub, Postman
